

--33. A portable storage device according to claim 27, wherein  
instructions in said memory media control said game program executing  
processing system to compare the actual moving speed of a displayed object  
in a previous frame with a predetermined speed.--

---

**REMARKS**

This application is a continuation of allowed parent application Serial No. 08/836,787. In this Preliminary Amendment, original parent claims 1-10 have been cancelled and new claims 11-33 have been inserted.

Attached herewith for the Examiner's approval is Figure 33 from parent application Serial No. 08/836,787. This Figure, due to a clerical error, was inadvertently omitted from the materials forwarded with this subject continuation application. In essence, the subject matter of original Figure 33 was fully disclosed at pages 37 and 38 of the specification filed in this. Pages 37 and 38 fully support Figure 33 and constitute a verbal flowchart set forth in the specification. Accordingly, even if the instant application was not filed as a continuation of parent application 08/836,787, it is submitted that Figure 33 would in no way constitute new matter given

the verbal description of Figure 33. Accordingly, entry of Figure 33 to correct the clerical error is respectfully requested.

The Examiner is advised that application Serial No. 08/836,731 is directed to subject matter related to the present application. During the prosecution of this application, efforts will be made to keep the Examiner informed as to the prior art supplied or applied in related patent applications, including related application Serial No. 08/836,731 as Official Actions are received in such applications.

Early and favorable consideration are respectfully requested.

Respectfully submitted,

**NIXON & VANDERHYE P.C.**
